Breakdown by global population 2019

5% of the global population now have gigabit internet available to them

Leading countries by gigabit coverage

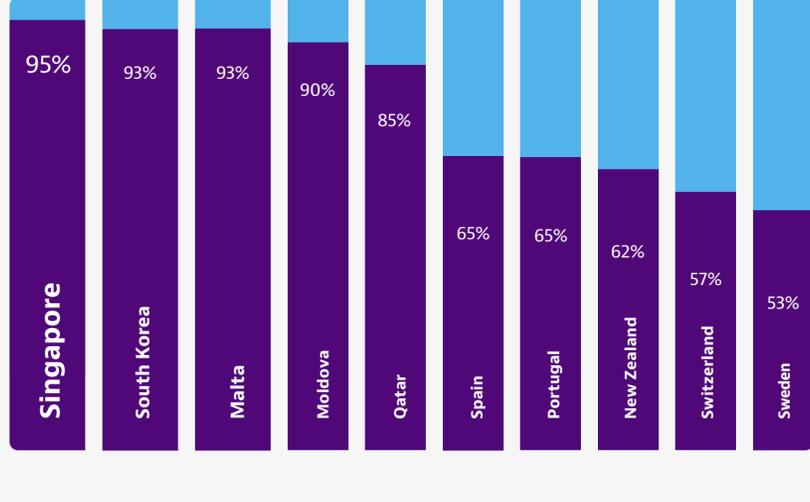

Shows the top ten countries with gigabit internet available to the most people

Leading countries by percentage of population with gigabit availability

Shows the countries where the greatest percentage of their populations have gigabit internet available to them

Regional gigabit leaderboard

EUROPE

Gigabit population coverage

Ranking	1	2	3	4	5	6	7	8	9	10
Country	Spain	Italy	France	United Kingdom	Portugal	Sweden	Romania	Switzerland	Hungary	Moldova
