Brand-Rex

12th December 2011

To Ed Gastle, JDSU. c/o DE

Re: The JDSU Certifier40G Device

Dear Ed,

Brand-Rex has received the new JDSU Certifier40G device and, after evaluation, approves the product for use in certification of the installed performance of Brand-Rex 10GPLUS, Cat6Plus and GigaPlus structured cabling systems.

The JDSU Certifier40G in our tests, proved reliable and consistent in measurement of both screened and unscreened cabling systems. The new JDSU Certifier40G is a significant advancement in test technology.

The JDSU Certifier40G is approved for characterising Brand-Rex 10GPLUS, Cat6Plus and GigaPlus products in channel, permanent link or CP link configurations against the published international standards. These standards include:

- ISO/IEC 11801:2002 and amendments
- EN 50173-1:2011
- ANSI/EIA/TIA 568C series, as applicable.

Please update the JDSU web site and documentation to acknowledge Brand-Rex's approval.

We look forward to continuing to work with JDSU in the future to evaluate new generations of products as they become available.

Best regards,

K G Hodge
