Subject: JDSU™ Certifier40G NGC-4500-FA Approval

To whom it may concern

Ortronics is pleased to announce the approval of the JDSU NGC-4500-FA cabling tester. This approval is based upon evaluation of this tester design versus network analyzer test results by Ortronics Test Labs. Certifier40G is approved for use in channel certification testing for Category6A/Class EA, Category 6/Class E and Category 5e/Class D system warranties.

The following configuration of Certifier 40G is required.

NGC-4500-FA Firmware and Reporting Console V4.5.1. or higher

Testing requirements with the Certifier 40G:

Channel testing for Category 6A/Class EA, Category 6/Class E and Category 5e/Class D using NGC-4500-6ACH2 (pair of CAT 6A channel adapters)

Permanent Link testing for Category 6A/Class EA, Category 6/Class E and Category 5e/Class D using NGC-4500-6ALKIT2 PERMAMENT LINK ADAPTER kit.

We will be notifying our sales and training teams who will forward this information to our installers and customers.

We will also update our (Ortronics) web site to acknowledge this approval.

We look forward to continuing this cooperation. I hope this information is of assistance to you and serves your requirements. Should you have any questions or concerns please feel free to contact me.
