VIAVI

OMS Integration

For centralized administration of your most powerful performance management tools, choose Viavi Solutions® Observer® Management Server (OMS). Professional consultants are available to help you quickly design, configure, and deploy central administration, management, security, and permissions for Observer GigaStor®, Observer Probes, Observer Analyzer, and more.

Did You Know:

Companies that take advantage of Viavi Solutions Consulting use twice as many performance management features on average

Let expert consultants configure a single solution to authenticate and manage users, security, policies, licenses, and upgrades. Establish and update permissions for individuals and groups. Get set up to record and monitor user and tool access activities. Connect with distributed teams to share filters and protocols so that you can facilitate troubleshooting and team learning.

How It Works

Viavi will configure your product with a focus on your organization's overall business goals. Implementation plans will be created with these in mind, and the configuration will be completed to your specifications. The Virtual Service is a remote session consisting of up to 2 half days, while the On-Site Service is up to 2 full days.

What You Get

Here are some of the areas that this service addresses:

- Users and user groups
- Assets and asset groups
- Authentication and authorization
- Licenses
- Policies
- Version control
- Filters and protocol management
- Hardware security module integration
- Certificates
- Failover
- Log configuration

On-Site Service

Up to 2 days on site

Virtual Service

Up to 2 half days via web meeting

Relates to the Viavi Observer Management Server (OMS)
