Subject: VIAVI Solutions SmartClass Fiber OLTS-85P Approval

Dear Mr. Gastle:

CommScope is pleased to announce the approval for use of the VIAVI Solutions SmartClass Fiber OLTS-85P effective immediately under the conditions of this letter. This approval is based upon evaluation of SmartClass Fiber OLTS-85P against the optical loss test equipment used in CommScope Labs.

SmartClass Fiber OLTS-85P has demonstrated a high degree of correlation with laboratory test results and is approved for use in Duplex Channel Link certification testing for all CommScope Multimode and Single-mode^{Note1} structured cabling systems.

The following VIAVI Solutions SmartClass Fiber OLTS-85P software and accessories are required:

Firmware V2.02 or higher

Channel Testing (IL) for Multimode	EF-Compliant Source and Reference-grade Launch Cable ^{Note 1,2,3}
Channel Testing (IL) for Single-mode	See Note 1

Note 1: Refer to CommScope SYSTIMAX 25 Year Warranty application requirements.

Note 2: Verify EF compliance of source in conjunction with reference-grade launch cable per the guidance of ANSI-TIA-526-14-C and “CommScope Structured Connectivity Solution Field Testing Guidelines for Fiber-Optics Cabling Systems” document.

Note 3: Adherence to “CommScope Structured Connectivity Solution Field Testing Guidelines for Fiber-Optics Cabling Systems” document is required for certification and warranty purposes.

The CommScope SYSTIMAX 25 Year Warranty application requirements will be updated to include the VIAVI Solutions SmartClass Fiber OLTS-85P.

CommScope looks forward to a continued cooperation and future opportunities to evaluate VIAVI Solutions products that can be used to test and certify CommScope cabling installations.

Sincerely,

Gary Irwin
Sr Manager, R&D and Systems Engineering
CCS Division
