

## QUICK CARD

This quick card outlines how to transfer reports or OTDR traces from the T-BERD 5800 to a smart phone or tablet, email the files to a PC, and view OTDR traces on the PC using VIAVI FiberCable2 software.

### EQUIPMENT REQUIREMENTS

#### Equipment Requirements:

- T-BERD 5800
- Smart Phone or tablet with **VIAVI Mobile Tech App**.

Figure 1: Equipment Requirements

### CONFIGURING T-BERD 5800 BLUETOOTH SETTINGS

1. After powering on the T-BERD, tap the System icon at the top of the screen.
2. Tap the Bluetooth Icon.
3. Check "Enable Bluetooth".
4. Check "Allow other devices".

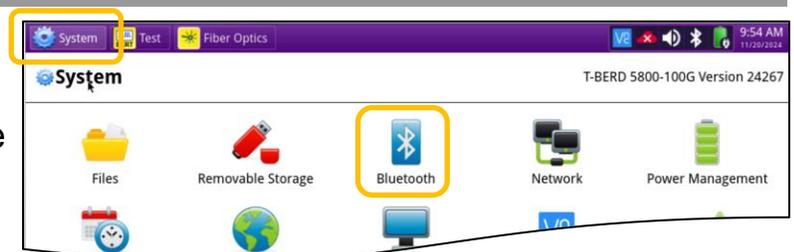

Figure 2: System Screen

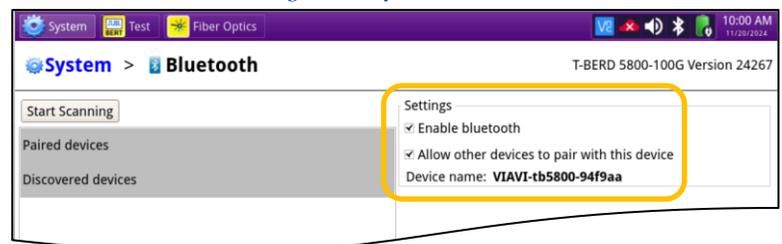

Figure 3: Bluetooth Settings

### PAIR MOBILE DEVICE WITH T-BERD 5800

1. On the Mobile device, Open **Settings** and **Bluetooth**.
2. Search for VIAVI-tb5800-xxxxxx.
3. Connect to Viavi-tb5800-xxxxxx.

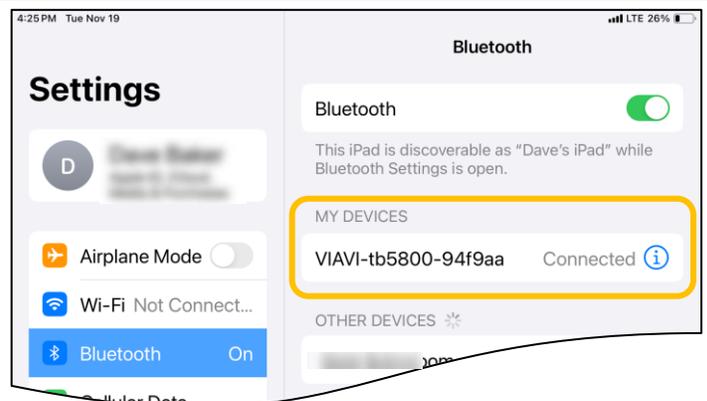

Figure 4: Bluetooth Settings

## QUICK CARD

### CONNECTING YOUR PHONE OR TABLET TO THE OPTIMETER

#### Android Devices:

1. Open Mobile Tech App on Smart Phone or Tablet.
2. If prompted, allow Mobile Tech to use Bluetooth. Allow Mobile Tech to use your location if you wish Geolocation to be included in reports.
3. Tap “**Connect to New Instrument**” to view Discovered Instruments
4. The T-BERD 5800 will appear under “**Discovered Devices**”
5. Press [**Connect**]
6. Close the popup window regarding Stratasync.

#### Apple Devices:

1. Open Mobile Tech App on iPhone or iPad.
2. If prompted, allow Mobile Tech to use Bluetooth. Allow Mobile Tech to use your location if you wish Geolocation to be included in reports.
3. Select [**Local Mode**].

A Green dot ● in top right indicates the phone or tablet is connected to the T-BERD 5800.

## QUICK CARD

### EMAILING TEST REPORTS

1. Tap [T-BERD 58xx Files]
2. Select the “bert” folder.
3. Select the “reports” sub-folder.
4. Press the 3 dots next to the desired file and press “Share”:
  - ▶ .PDF files are reports
  - ▶ .JSON contain job data
  - ▶ .SOR files are OTDR Traces viewable with OTDR software

## QUICK CARD

### EMAILING TEST REPORTS (CONTINUED)

5. Select an Application to share the file: Mail, Outlook, etc..
6. Use the Application to send the file to the desired recipient.
7. Press “Up a Folder” and repeat for additional files of interest.
  - ▶ The **bert/capture** folder contains .PCAP packet capture files that are viewable with Wireshark™
  - ▶ The **bert/tests** folder contains .tst test configuration files and profiles that can be shared with other T-BERD 5800 instruments.
  - ▶ The **fiber** folder contains .PDF reports and .SOR OTDR trace files that are viewable with OTDR software.

## QUICK CARD

### VIEWING OTDR TRACE FILES ON A PC OR LAPTOP

VIAVI's FiberCable 2 Software enables users to view, edit, analyze and print optical test data acquired in the field with the t-berd 5800:

1. Download and install [FiberCable 2 Suite Software](https://ofs.updatemyunit.net/) from <https://ofs.updatemyunit.net/>
2. FiberCable 2 Trace Viewer will become the default application for .SOR files.
3. Open the .SOR file attached to your email.
4. The OTDR trace will be displayed in the Trace Viewer software.

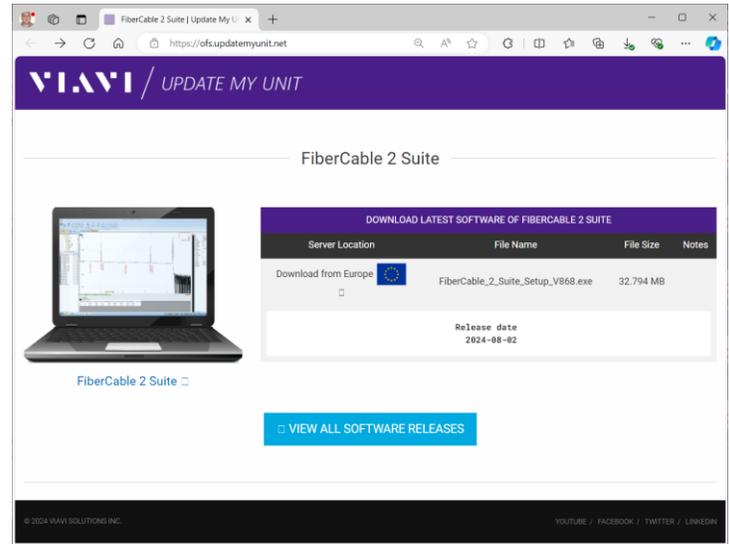

Figure 13: Mail Application

Use **Report** controls to print reports.

- Set Printer Name to "Microsoft Print to PDF" or a PDF creator to save PDF reports.
- Use Page Settings to enter company name and path to logo file

Use **Display** controls to display Trace only or Trace, Table and Map

Use **Zoom** and **Shift** controls to optimize the Trace view
