1 Introduction

This document summarizes the new features in the Revision 9.00.08 HST base unit firmware. Highlights of the new capabilities added to the HST in this release include:

Release (FCS) of Revision 9.00.08 Firmware – August 27, 2022

The firmware will be made available on the internal FTP site (<ftp://157.234.214/59/HST>) for downloading by Viavi Solutions personnel or to the general public on www.ViaviSolutions.com/hst under the Downloads tab.

NOTE: This release is ONLY supported on HST units with ACE II hardware. HST units with ACE I/NANYA hardware are NOT supported. 9.00.08 upgrade is only for the Color display the Black and White Display is not supported.

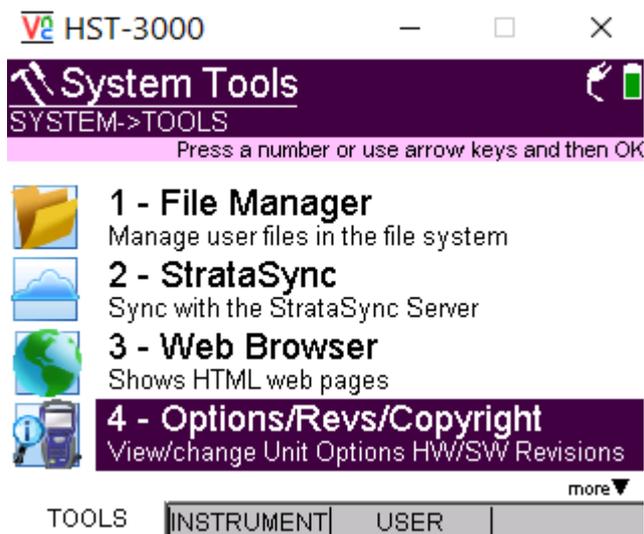

HST maincode version 9.00.08

This code is built from 9.00.06.

The only change is a security update with the interface to StrataSync.

- The TLS version is now TLS 1.2.
- Previous TLS version was 1.0/1.1.
