

# How to Add user email in the report

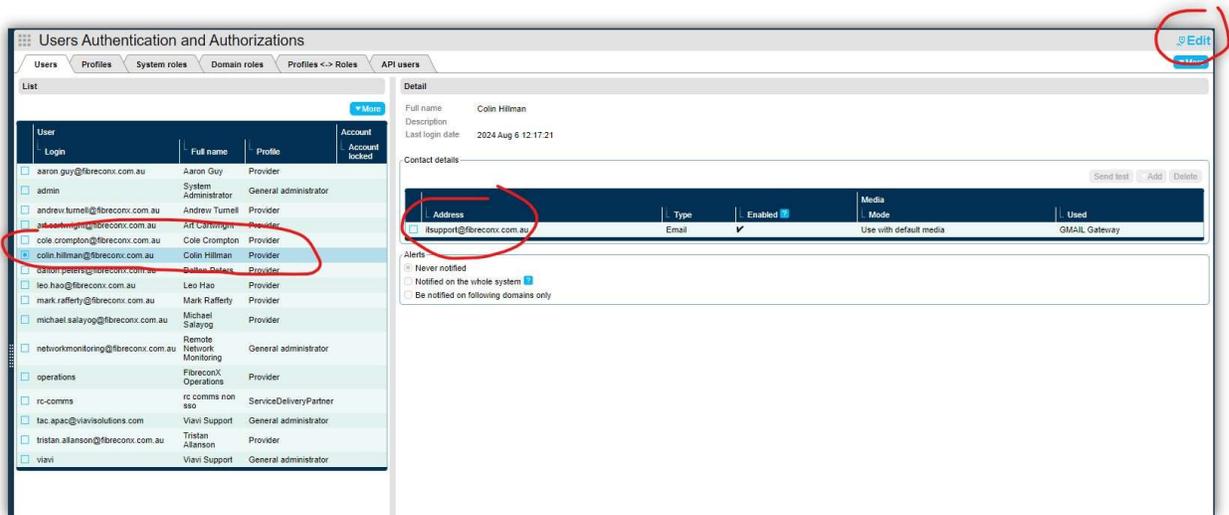

## How to Add user email in the report

1. Check existing user with email address configured. Double click System and go to Users.

2. Verify if the user exists and email address is configured accordingly. You can edit it if needed.

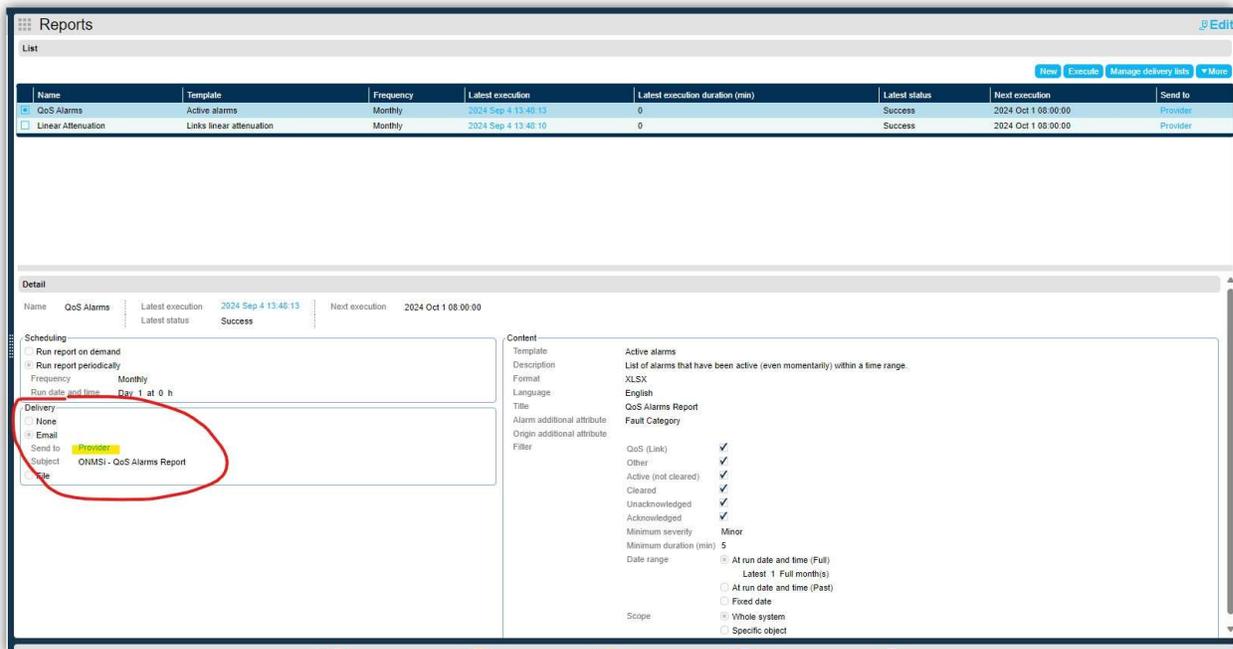

3. Go to report

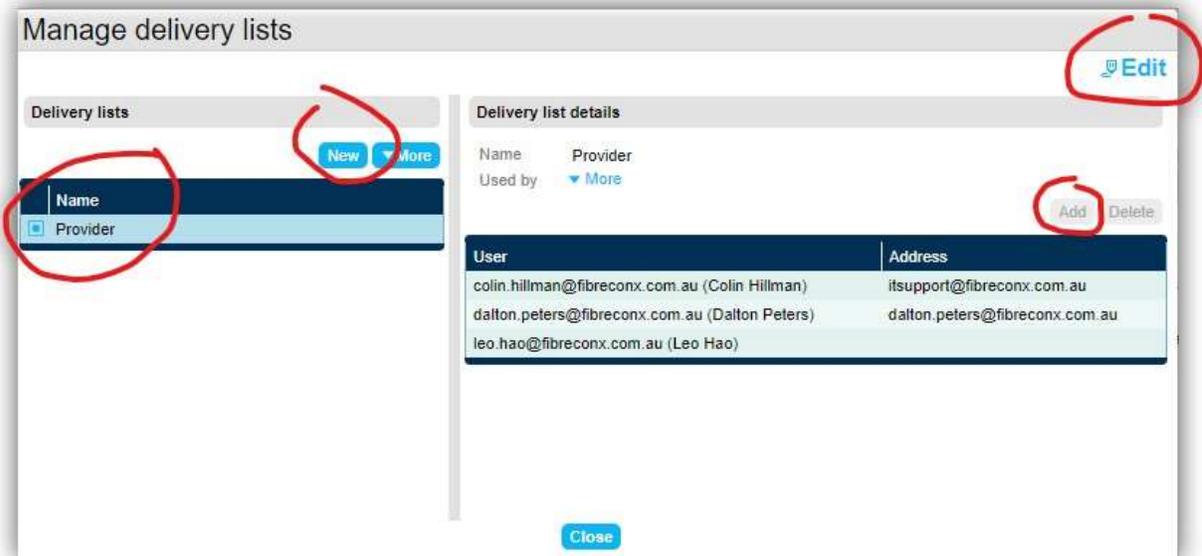

## How to Add user email in the report

4. Select delivery method. For FCX, the list or recipient is configured in "Provider"

5. You can add new one if needed.
