What is the difference between the various Qg 2 units?

VIAVI
VIAVI Solutions

Qg 2 comes in different flavors. The main differentiators being:

- slave capacity: this is how many unicast slaves that Qg 2 supports. Base model can support up to 32 slaves.
- holdover capacity: we support 4 hour and 8 hour options. This is how long we can sustain 1.5 µs time error if we lose synchronization.

You can find more information at this link for Qg 2
